REPORT OF THE BOARD OF DIRECTORS

The Board of Directors of SATHAPANA Bank Plc. ("the Bank") is pleased to present its report and the Bank's financial statements as at 31 December 2024 and for the year then ended.

### THE BANK

SATHAPANA Limited, the micro-finance institution ("MFI"), was incorporated in the Kingdom of Cambodia by the Ministry of Commerce ("MoC") on 19 February 2003, based on the Memorandum and Articles of Association signed on 27 December 2002 between Cambodia Community Building ("CCB"), a local non-governmental organization established in 1996 and the MFI's staff. The MFI obtained its license to operate as a micro-finance institution from the National Bank of Cambodia ("NBC") on 23 April 2003 and, from 19 April 2006, with an indefinite term. Under the micro-finance license, the MFI was authorized to grant credit and offer saving services to poor and low-income households and small enterprise operating in the Kingdom of Cambodia.

On 22 January 2009, the MFI received a license from the NBC to conduct deposit-taking business. On 11 February 2014, the MFI received another 3-year license to conduct money exchange business.

On 19 October 2012, MARUHAN Japan Bank ("MJB") entered into a sale and purchase agreement with Stichting Triodos-Doen, Nederlandse Financierings-Maatschapij Voor Ontwikellingslanden N.V., DWM Funds S.C.A.-SICAV SIF, CCB, and SATHAPANA Employee Investment Limited to acquire 95.1% equity in SATHAPANA Limited. This transaction was approved by the NBC on 5 December 2012 with the subject shares approved for change in ownership by the MoC on 17 December 2012.

On 8 February 2016, the Board of Directors of the MFI, pursuant to the option agreement with CCB, passed a resolution to approve the sale of the remaining 4.9% equity of the MFI to MJB, representing all the non-controlling interest of the MFI for a total price of US\$ 6.02 million. The transaction was completed on 17 March 2016.

In early 2015, MJB and SATHAPANA Limited agreed to merge the two institutions into one entity, under the name SATHAPANA Bank Plc., as approved by the NBC on 28 March 2016. On 29 March 2016, the NBC also granted the Bank its banking license with an indefinite term. On 1 April 2016, all assets and liabilities of MJB were transferred to the Bank.

The Bank operates its businesses in 25 provinces with a network of 175 branches.

### PRINCIPAL ACTIVITY

The Bank is principally engaged in all aspects of banking business and the provision of related financial services in the Kingdom of Cambodia.

### LOCATION

The registered office of the Bank is located at Sathapana Tower, No. 63, Preah Norodom Blvd., corner Street No. 172 and Street No. 174, Phnum 14, Sangkat Phsar Thmey 3, Khan Daun Penh, Phnom Penh, Kingdom of Cambodia. The Bank operates its businesses in 25 provinces with a network of 175 branches.

REPORT OF THE BOARD OF DIRECTORS (continued)

### EMPLOYEE

As at 31 December 2024, the Bank had 4,239 employees (2023: 4,608 employees).

### **FINANCIAL RESULT**

The financial performance of the Bank for the year ended 31 December 2024 is set out in the statement of comprehensive income.

### PAID-UP CAPITAL

The paid-up capital of the Bank as at 31 December 2024 is US\$ 290,000,000 (2023: US\$ 280,000,000).

### **RESERVES AND PROVISIONS**

There were no material movements to or from reserves and provisions during the financial year other than those recognized or disclosed in the financial statements.

# EXPECTED CREDIT LOSSES ON LOANS TO CUSTOMERS AND OTHER FINANCIAL ASSETS CARRIED AT AMORTIZED COST

Before the financial statements of the Bank were drawn up, the directors took reasonable steps to ascertain that action had been taken in relation to writing off or in recognizing provisions for expected credit losses, and satisfied themselves that all known bad loans and other financial assets carried at amortized cost had been written off and that reasonable provisions had been made for expected credit losses.

At the date of this report, the directors are not aware of any circumstances which would render the amount written off or the amount of the provisions for expected credit losses on loans to customers and other financial assets carried at amortized cost in the financial statements of the Bank inadequate in any material respect.

### ASSETS

Before the financial statements of the Bank were drawn up, the directors took reasonable steps to ensure that any assets which were unlikely to be realized in the ordinary course of business at their value as shown in the accounting records of the Bank, have been written down to an amount which they might be expected to realize.

At the date of this report, the directors are not aware of any circumstances which would render the values attributed to the assets in the financial statements of the Bank misleading in any material respect.

### VALUATION METHODS

At the date of this report, the directors are not aware of any circumstances that have arisen which would render adherence to the existing method of valuation of assets and liabilities in the financial statements of the Bank misleading or inappropriate in any material respect.

**REPORT OF THE BOARD OF DIRECTORS (continued)** 

#### CONTINGENT AND OTHER LIABILITIES

At the date of this report, there is:

- No charge on the assets of the Bank which has arisen since the end of the financial year which secures the liabilities of any other person; and,
- No contingent liability in respect of the Bank that has arisen since the end of the financial year other than in the ordinary course of business.

No contingent liability or other liability of the Bank has become enforceable, or is likely to become enforceable within the period of twelve months after the end of the financial year which, in the opinion of the directors, will or may have a material effect on the ability of the Bank to meet its obligations when they become due.

#### SUBSEQUENT EVENTS

No significant events occurred after 31 December 2024 requiring adjustment or disclosure other than those already recognized or disclosed in the accompanying notes to the financial statements.

### THE BOARD OF DIRECTORS

The members of the Board of Directors during the year and at the date of this report are:

Dr. Han Chang-Woo	Chairman (non-executive)
Mr. Han Ken	Vice-chairman (non-executive)
H.E. Shinohara Katsuhiro	Independent and non-executive director
H.E. Kim Vada	Independent and non-executive director
Mr. Williams John Gerard	Independent and non-executive director (appointed on 2 July 2024)
Mr. Iwasa Tomoyuki	Non-executive Director (resigned on 28 October 2024)
Mr. Nguyenle QuocAnh	Independent and non-executive director (resigned on 31 March 2024)
Mr. Hosoi Takehito	Non-Executive Director (appointed on 2 July 2024)
Mr. Hiramatsu Naoya	Non-Executive Director (appointed on 2 July 2024)
Mr. Kawahara Yoshiki	Non-Executive Director (appointed on 27 February 2024)

#### AUDITORS

Ernst & Young (Cambodia) Ltd. is the auditor of the Bank

#### DIRECTORS' BENEFIT

During and at the end of the financial year, no arrangements subsisted to which the Bank is a party, with the object of enabling the directors of the Bank to acquire benefits by means of the acquisition of shares in or debentures of the Bank or any other corporate body.

The directors have not received or become entitled to receive any benefit by reason of a contract made by the Bank or a related corporation with the director or with a firm of which the director is a member, or with a company in which the director has a substantial financial interest other than as disclosed in the financial statements.

REPORT OF THE BOARD OF DIRECTORS (continued)

### BOARD OF DIRECTORS' RESPONSIBILITY IN RESPECT OF THE FINANCIAL STATEMENTS

The Board of Directors is responsible for ensuring that the financial statements give a true and fair view of the financial position of the Bank as at 31 December 2024, and its financial performance and cash flows for the year then ended in accordance with Cambodian International Financial Reporting Standards ("CIFRSs"). The Board of Directors oversees preparation of these financial statements by management who is required to:

- i) adopt appropriate accounting policies which are supported by reasonable and prudent judgments and estimates and then apply them consistently;
- ii) comply with CIFRSs or, if there have been any departures in the interest of fair presentation, these have been appropriately disclosed, explained and quantified in the financial statements;
- iii) maintain adequate accounting records and an effective system of internal controls;
- iv) prepare the financial statements on a going concern basis unless it is inappropriate to assume that the Bank will continue operations in the foreseeable future; and,
- v) effectively control and direct the Bank in all material decisions affecting the operations and performance and ascertain that these have been properly reflected in the financial statements.

Management is responsible for ensuring that proper accounting records are kept which disclose, with reasonable accuracy at any time, the financial position and performance of the Bank and to ensure that the accounting records comply with the registered accounting system. It is also responsible for safeguarding the assets of the Bank and for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The Board of Directors confirms that the Bank has complied with the above requirements in preparing the financial statements.

### APPROVAL OF THE FINANCIAL STATEMENTS

We hereby approve the accompanying financial statements that give a true and fair view of the financial position of the Bank as at 31 December 2024, and its financial performance and cash flows for the year then ended in accordance with CIFRSs.

### Independent auditor's report

### To: The Board of Directors and Shareholder of SATHAPANA Bank Plc.

### Opinion

We have audited the financial statements of SATHAPANA Bank Plc. ("the Bank"), which comprise the statement of financial position as at 31 December 2024, and the statement of comprehensive income, statement of changes in equity and statement of its cash flows for the year then ended, and notes to the financial statements, including material accounting policy information.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Bank as at 31 December 2024, and its financial performance and its cash flows for the year then ended in accordance with Cambodian International Financial Reporting Standards ("CIFRSs").

### Basis for opinion

We conducted our audit in accordance with Cambodian International Standards on Auditing ("CISAs"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Bank in accordance with the Code of Ethics for Professional Accountants and Auditors issued by the Ministry of Economy and Finance of Cambodia, together with the ethical requirements that are relevant to our audit of the financial statements in Cambodia, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Emphasis of matter – Correction of Prior Year's Error

We draw attention to Note 34 of the financial statements which describes the effects of management's correction of prior year's accounting error in relation to prepaid tax on income, which was recognized as income tax expense rather than income tax credit under other assets. Our opinion is not modified in respect of this matter.

### Other matter

The financial statements of the Bank for the year ended 31 December 2023, were audited by another auditor who expressed an unmodified opinion on those statements on 25 March 2024.

## Information Other than the Financial Statements and Auditor's Report Thereon

The other information comprises the Report of the Board of Directors, but does not include the financial statements and our auditor's report thereon which we obtained prior to the date of this auditor's report, and the annual report, which is expected to be made available to us after that date. Management is responsible for the other information.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

# Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with CIFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Bank's financial reporting process.

### Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with CISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with CISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to
  fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
  evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not
  detecting a material misstatement resulting from fraud is higher than for one resulting from error,
  as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override
  of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
  procedures that are appropriate in the circumstances, but not for the purpose of expressing an
  opinion on the effectiveness of the Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting
  and based on the audit evidence obtained, whether a material uncertainty exists related to events
  or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If
  we conclude that a material uncertainty exists, we are required to draw attention in our auditor's
  report to the related disclosures in the financial statements or, if such disclosures are inadequate,
  to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of
  our auditor's report. However, future events or conditions may cause the Bank to cease to
  continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

# Auditor's Responsibilities for the Audit of the Financial Statements (continued)

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

NOTES TO THE FINANCIAL STATEMENTS as at 31 December 2024 and for the year then ended

### 1. GENERAL INFORMATION

SATHAPANA Bank Plc. ("the Bank") was incorporated and registered in the Kingdom of Cambodia.

### Establishment and operation

SATHAPANA Limited, the micro-finance institution ("MFI"), was incorporated in the Kingdom of Cambodia by the Ministry of Commerce ("MoC") on 19 February 2003, based on the Memorandum and Articles of Association signed on 27 December 2002 between Cambodia Community Building ("CCB"), a local non-governmental organization established in 1996 and the MFI's staff. The MFI obtained its license to operate as a micro-finance institution from the National Bank of Cambodia ("NBC") on 23 April 2003 and, from 19 April 2006, with an indefinite term. Under the micro-finance license, the MFI is authorized to grant credit and offer saving services to poor and low-income households and small enterprise operating in the Kingdom of Cambodia.

On 22 January 2009, the MFI received a license from the NBC to conduct deposit-taking business. On 11 February 2014, the MFI received another 3-year license to conduct money exchange business.

On 19 October 2012, MARUHAN Japan Bank ("MJB") entered into a sale and purchase agreement with Stichting Triodos-Doen ("ST"), Nederlandse Financierings-Maatschapij Voor Ontwikellingslanden N.V. ("NFVO"), DWM Funds S.C.A.-SICAV SIF ("DWM"), CCB, and SATHAPANA Employee Investment Limited ("SEI") to acquire 95.1% equity in SATHAPANA Limited. This transaction was approved by the NBC on 5 December 2012 with the subject shares approved for change in ownership by the MoC on 17 December 2012.

On 8 February 2016, the Board of Directors of the MFI, pursuant to the option agreement with CCB, passed a resolution to approve the sale of the remaining 4.9% equity of the MFI to MJB, representing all the non-controlling interest of the MFI for a total price of US\$ 6.02 million. The transaction was completed on 17 March 2016.

In early 2015, MJB and SATHAPANA Limited agreed to merge the two institutions into one entity, under the name SATHAPANA Bank Plc., as approved by the NBC on 28 March 2016. On 29 March 2016, the NBC also granted the Bank its banking license with an indefinite term. On 1 April 2016, all assets and liabilities of MJB were transferred to the Bank.

The registered office of the Bank is located at Sathapana Tower, No. 63, Preah Norodom Blvd., corner Street No. 172 and Street No. 174, Phnum 14, Sangkat Phsar Thmey 3, Khan Daun Penh, Phnom Penh, Kingdom of Cambodia.

The Bank operates its businesses in 25 provinces with a network of 175 branches.

As at 31 December 2024, the Bank had 4,239 employees (2023: 4,608 employees).

### Principal activity

The Bank is principally engaged in all aspects of banking business and the provision of related financial services in the Kingdom of Cambodia.

### Paid-up capital

The paid-up capital of the Bank as at 31 December 2024 is US\$ 290,000,000 (2023: US\$ 280,000,000).

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 1. **GENERAL INFORMATION** (continued)

### The Board of Directors

The members of the Board of Directors during the year and at the date of this report are:

Dr. Han Chang-Woo	Chairman (non-executive)
Mr. Han Ken	Vice-chairman (non-executive)
H.E. Shinohara Katsuhiro	Independent and non-executive director
H.E. Kim Vada	Independent and non-executive director
Mr. Williams John Gerard	Independent and non-executive director (appointed on 2 July 2024)
Mr. Iwasa Tomoyuki	Non-Executive Director (resigned on 28 October 2024)
Mr. Nguyenle QuocAnh	Independent and non-executive director (resigned on 31 March 2024)
Mr. Hosoi Takehito	Non-Executive Director (appointed on 2 July 2024)
Mr. Hiramatsu Naoya	Non-Executive Director (appointed on 2 July 2024)
Mr. Kawahara Yoshiki	Non-Executive Director (appointed on 27 February 2024)

### 2. MATERIAL ACCOUNTING POLICY INFORMATION

The material accounting policy information adopted in the preparation of the financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

### 2.1 Basis of preparation

The financial statements have been prepared on a historical cost basis, except for items which are not prepared under historical cost basis such as:

- Financial instruments at amortized cost;
- Financial instruments which are valued at fair value;
- Defined benefit obligation; and,
- Provisions measured at its best estimate of the expenditure required to settle the present obligation, with discounting if the effect of time value of money is material.

### Fiscal year

The Bank's fiscal year starts on 1 January and ends on 31 December.

### 2.2 Statement of compliance

The financial statements of the Bank have been prepared in accordance with Cambodian International Financial Reporting Standards ("CIFRSs").

The Accounting and Auditing Regulator, as mandated by Prakas (Circular) No. 068-MEF-Pr dated 8 January 2009 issued by the Ministry of Economy and Finance of Cambodia, has adopted International Financial Reporting Standards ("IFRSs") issued by the International Accounting Standards Board ("IASB") unless deferred, otherwise. The standards are referred to as CIFRSs.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

### 2.3 Presentation of financial statements

The Bank presents its statement of financial position in the order of liquidity based on the Bank's intention and perceived ability to recover/settle the majority of assets/liabilities of the corresponding financial statement line items. An analysis of recovery or settlement within 12 months after the reporting date ("current") and more than 12 months after the reporting date ("non-current") is presented in Note 31.

### 2.4 Functional and presentation currency

The functional currency of the Bank is United States dollar ("US\$"). The financial statements are presented in US\$ and all values are rounded to the nearest dollar, except when otherwise indicated. The translation of the US\$ amounts into Khmer Riel ("KHR") is included solely for meeting the presentation requirement pursuant to the Law on Accounting and Auditing dated 11 April 2016 and have been made using the prescribed official exchange rate based on the applicable exchange rate per US\$ 1 as announced by the NBC.

The financial statements are presented in KHR based on the following applicable exchange rates per US\$ 1:

	2024	2023
Closing rate	4,025	4,085
Average rate*	4,071	4,110

\* The average amounts were determined using the NBC's average of daily rates.

### 2.5 Summary of material accounting policy information

The accounting policies set out below have been applied consistently to all periods presented in these financial statements, unless otherwise indicated.

### 2.5.1 Financial assets and financial liabilities

### (a) Recognition and initial measurement

Financial assets and financial liabilities are recognized when the Bank becomes a party to the contractual provisions of the financial instrument.

A financial asset or financial liability is measured initially at fair value plus transaction costs that are directly attributable to its acquisition or issuance.

(b) Classification

### Financial assets

On initial recognition, a financial asset is classified as measured at: amortized cost, fair value through other comprehensive income ("FVOCI") or fair value through profit or loss ("FVTPL").

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as FVTPL:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and,
- the contractual terms of the financial asset give rise on specified dates to cash flows that are 'solely payment for principal and interest' ("SPPI").

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

### 2.5 Summary of material accounting policy information (continued)

### 2.5.1 *Financial assets and financial liabilities* (continued)

(b) Classification (continued)

### *Financial assets* (continued)

A debt instrument is measured at FVOCI only if it meets both of the following conditions and is not designated as FVTPL:

- the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and,
- the contractual terms of the financial asset give rise on specified dates to cash flows that are SPPI.

On initial recognition of an equity investment that is not held for trading, the Bank may irrevocably elect to present subsequent changes in fair value in other comprehensive income ("OCI"). This election is made on an investment-by-investment basis.

All other financial assets are classified as measured at FVTPL.

In addition, on initial recognition, the Bank may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortized cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

### Business model assessment

The Bank makes an assessment of the objective of a business model in which an asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to Management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. In particular, whether management's strategy focuses on earning contractual interest revenue, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of the liabilities that are funding those assets or realizing cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Bank's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and its strategy for how those risks are managed;
- how managers of the business are compensated (e.g., whether compensation is based on the fair value of the assets managed or the contractual cash flows collected); and,
- the frequency, volume and timing of sales in prior periods, the reasons for such sales and its expectations about future sales activity. However, information about sales activity is not considered in isolation, but as part of an overall assessment of how the Bank's stated objective for managing the financial assets is achieved and how cash flows are realized.

Financial assets that are held for trading or managed and whose performance is evaluated on a fair value basis are measured at FVTPL because they are neither held to collect contractual cash flows nor held both to collect contractual cash flows and to sell financial assets.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

### 2.5 Summary of material accounting policy information (continued)

### 2.5.1 Financial assets and financial liabilities (continued)

(b) Classification (continued)

Financial assets (continued)

### Assessment of whether contractual cash flows are SPPI

For purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g., liquidity risk and administrative costs), as well as profit margin.

In assessing whether the contractual cash flows are SPPI, the Bank considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition.

In making the assessment, the Bank considers:

- contingent events that would change the amount and timing of cash flows;
- leverage features;
- prepayment and extension terms;
- terms that limit the Bank's claim to cash flows from specified assets (e.g., non-recourse loans); and,
- features that modify consideration of the time value of money (e.g., periodical reset of interest rates).

### Non-recourse loans

In some cases, loans made by the Bank that are secured by collateral of the borrower limit the Bank's claim to cash flows of the underlying collateral ("non-recourse loans"). The Bank applies judgment in assessing whether the non-recourse loans meet the SPPI criterion. The Bank typically considers the following information when making this judgement:

- whether the contractual arrangement specifically defines the amounts and dates of the cash payments of the loan;
- the fair value of the collateral relative to the amount of the secured financial asset;
- the ability and willingness of the borrower to make contractual payments, notwithstanding a decline in the value of collateral;
- whether the borrower is an individual or a substantive operating entity or is a specialpurpose entity;
- the Bank's risk of loss on the asset relative to a full-recourse loan;
- the extent to which the collateral represents all or a substantial portion of the borrower's assets; and,
- whether the Bank will benefit from any upside from the underlying assets.

### Reclassifications

Financial assets are not reclassified subsequent to their initial recognition, except in the period after the Bank changes its business model for managing financial assets.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

### 2.5 Summary of material accounting policy information (continued)

### 2.5.1 Financial assets and financial liabilities (continued)

### (c) Derecognition

### Financial assets

The Bank derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred, or in which the Bank neither transfers nor retains substantially all of the risks and rewards of ownership, and it does not retain control of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset derecognized) and the sum of (i) the consideration received (including any new asset obtained less any new liability assumed) and (ii) any cumulative gain or loss that had been recognized in OCI is recognized in profit or loss.

### Financial liabilities

The Bank derecognizes a financial liability when its contractual obligations are discharged or cancelled or expire.

(d) Modifications of financial assets and financial liabilities

### Financial assets

If the terms of a financial asset are modified, then Bank evaluates whether the cash flows of the modified asset are substantially different.

If the cash flows are substantially different, then the contractual rights to cash flows from the original financial asset are deemed to have expired. In this case, the original financial asset is derecognized and a new financial asset is recognized at fair value plus any eligible transaction costs. Any fees received as part of the modification are accounted for as follows:

- fees that are considered in determining the fair value of the new asset and fees that represent reimbursement of eligible transaction costs are included in the initial measurement of the asset; and,
- other fees are included in profit or loss as part of the gain or loss on derecognition.

If cash flows are modified when the borrower is in financial difficulties, then the objective of the modification is usually to maximize recovery of the original contractual terms rather than to originate a new asset with substantially different terms. If the Bank plans to modify a financial asset in a way that would result in forgiveness of cash flows, then it first considers whether a portion of the asset should be written off before the modification takes place (see write-off policy in Note 2.5.1(g)). This approach impacts the result of the quantitative evaluation and means that the derecognition criteria are not usually met in such cases.

If the modification of a financial asset measured at amortized cost or FVOCI does not result in derecognition of the financial asset, then the Bank first recalculates the gross carrying amount of the financial asset using the original effective interest rate of the asset and recognizes the resulting adjustment as a modification gain or loss in profit or loss. For floating-rate financial assets, the original effective interest rate used to calculate the modification gain or loss is adjusted to reflect current market terms at the time of the modification. Any costs or fees incurred and fees received as part of the modification adjust the gross carrying amount of the modified financial asset and are amortized over the remaining term of the modified financial asset.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

### 2.5 Summary of material accounting policy information (continued)

### 2.5.1 Financial assets and financial liabilities (continued)

### (d) Modifications of financial assets and financial liabilities (continued)

### Financial assets (continued)

If such modification is carried out because of financial difficulties of the borrower, then the gain or loss is presented together with impairment losses. In other cases, it is presented as interest income calculated using the effective interest method.

### Financial liabilities

The Bank derecognizes a financial liability when its terms are modified and the cash flows of the modified liability are substantially different. In this case, a new financial liability based on the modified terms is recognized at fair value. The difference between the carrying amount of the financial liability derecognized and consideration paid is recognized in profit or loss. Consideration paid includes non-financial assets transferred, if any, and the assumption of liabilities, including the new modified financial liability.

If the modification of a financial liability is not accounted for as derecognition, then the amortized cost of the liability is recalculated by discounting the modified cash flows at the original effective interest rate and the resulting gain or loss is recognized in profit or loss. For floating-rate financial liabilities, the original effective interest rate used to calculate the modification gain or loss is adjusted to reflect current market terms at the time of the modification. Any costs and fees incurred are recognized as an adjustment to the carrying amount of the liability and amortized over the remaining term of the modified financial liability by re-computing the effective interest rate on the instrument.

### (e) Offsetting

Financial assets and financial liabilities are offset and the net amount is presented in the statement of financial position when, and only when, the Bank has a legal right to set off the amounts and it intends either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

### (f) Fair value measurement

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal market or, in its absence, the most advantageous market to which the Bank has access at that date. The fair value of a liability reflects its non-performance risk.

When one is available, the Bank measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as 'active' if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the Bank uses valuation techniques that maximize the use of relevant observable inputs and minimize the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

### 2.5 Summary of material accounting policy information (continued)

### 2.5.1 Financial assets and financial liabilities (continued)

### (f) Fair value measurement (continued)

The best evidence of the fair value of a financial instrument on initial recognition is normally the transaction price – i.e., the fair value of the consideration given or received. If the Bank determines that the fair value on initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique for which any unobservable inputs are judged to be insignificant in relation to the measurement, then the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value on initial recognition and the transaction price. Subsequently, that difference is recognized in profit or loss on an appropriate basis over the life of the instrument but no later than when the valuation is wholly supported by observable market data or the transaction is closed out.

If an asset or a liability measured at fair value has a bid price and an ask price, then the Bank measures assets and long positions at a bid price and liabilities and short positions at an ask price.

Portfolios of financial assets and financial liabilities that are exposed to market risk and credit risk that are managed by the Bank on the basis of the net exposure to either market or credit risk are measured on the basis of a price that would be received to sell a net long position (or paid to transfer a net short position) for the particular risk exposure. Portfolio-level adjustments – e.g., bid-ask adjustment or credit risk adjustments that reflect the measurement on the basis of the net exposure – are allocated to the individual assets and liabilities on the basis of the relative risk adjustment of each of the individual instruments in the portfolio.

The fair value of a financial liability with a demand feature (e.g., demand deposit) is not less than the amount payable on demand, discounted from the first date on which the amount could be required to be paid.

The Bank recognizes transfers between levels of the fair value hierarchy as of the end of the reporting period during which the change has occurred.

(g) Impairment

The Bank recognizes allowance for expected credit losses ("ECL") on the following financial instruments that are not measured at FVTPL:

- financial assets that are debt instruments; and,
- loan commitments issued.

No impairment loss is recognized on equity investments.

The Bank measures loss allowance at an amount equal to lifetime ECL, except for the following, for which they are measured as 12-month ECL:

- debt investment securities that are determined to have low credit risk at the reporting date; and,
- other financial instruments on which credit risk has not increased significantly since their initial recognition.

12-month ECL is the portion of ECL that results from default events on a financial instrument that are possible within the 12 months after the reporting date. Financial instruments for which a 12-month ECL is recognized are referred to as 'Stage 1 financial instruments'.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

### 2.5 Summary of material accounting policy information (continued)

### 2.5.1 *Financial assets and financial liabilities* (continued)

### (g) Impairment (continued)

Lifetime ECL is the ECL that results from all possible default events over the expected life of the financial instrument. Financial instruments for which a lifetime ECL is recognized but which are not credit-impaired are referred to as 'Stage 2 financial instruments'.

At each reporting date, the Bank assesses whether the credit risk of a financial instrument has increased significantly since initial recognition. When credit risk has increased significantly since initial recognition, loss allowance is measured at an amount equal to its lifetime ECL.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECL, the Bank considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Bank's historical experience and informed credit assessment and includes forward-looking information.

If credit risk has not increased significantly since initial recognition or if the credit quality of the financial instruments improves such that there is no longer a significant increase in credit risk since initial recognition, loss allowance is measured at an amount equal to 12-month ECL.

The maximum period considered when estimating ECL is the maximum contractual period over which the Bank is exposed to credit risk.

### Determining whether credit risk has increased significantly

The Bank assesses whether credit risk has increased significantly since initial recognition at each reporting date. Determining whether an increase in credit risk is significant depends on the characteristics of the financial instrument and the borrower, and the geographical region.

The Bank considers that a significant increase in credit risk occurs when an asset is more than 30 days past due ("DPD"). Days past due are determined by counting the number of days since the earliest elapsed due date in respect of which full payment has not been received. Due dates are determined without considering any grace period that might be available to the borrower.

If there is evidence that there is no longer a significant increase in credit risk relative to initial recognition, then the loss allowance on an instrument returns to being measured as 12-month ECL.

### Definition of default

The Bank considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Bank in full, without recourse by the Bank to actions such as realizing security (if any is held);
- the Bank considers that a significant increase in credit risk occurs when an asset is more than 30 days past due;
- when the account undergoes debt restructuring or rescheduling;
- when account shows deterioration in its credit profile but its delinquency does not exceed 30 days past due (forced accounts); or
- when accounts are crossed default by obligor(s) of the same borrower type within the same loan listing source.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

### 2.5 Summary of material accounting policy information (continued)

### 2.5.1 Financial assets and financial liabilities (continued)

(g) Impairment (continued)

### Measurement of ECL

ECL is a probability-weighted estimate of credit losses, measured as follows:

- Financial assets that are not credit-impaired at the reporting date: as the present value of all cash shortfalls (i.e., the difference between the cash flows due to the Bank in accordance with the contract and the cash flows that the Bank expects to receive);
- Financial assets that are credit-impaired at the reporting date: as the difference between the gross carrying amount and the present value of estimated future cash flows; and,
- Undrawn loan commitments: as the present value of the difference between the contractual cash flows that are due to the Bank if the commitment is drawn down and the cash flows that the Bank expects to receive.

Inputs, assumptions and techniques used for estimating ECL

The key inputs into the measurement of ECL are the term structure of the following variables:

- Probability of default ("PD");
- Loss given default ("LGD");
- Exposure at default ("EAD");
- Economic factor adjustment ("EFA"); and
- Discount factor ("DF").

ECL for exposures in Stage 1 is calculated by multiplying the 12-month PD by 12-month EAD, by 12-month EFA, by pool LGD and by DF. Lifetime ECL is calculated by multiplying the lifetime PD by lifetime EAD, by lifetime EFA, by pool LGD and by DF.

The Bank adopts the delinquency-based transition matrix, historical loss rate model and proxy models to estimate its PD.

LGD is the magnitude of the likely loss if there is a default. The Bank estimates LGD parameters based on the history of recovery rates of claims against defaulted counterparties. The LGD models consider the structure, collateral, seniority of the claim, counterparty industry and recovery costs of any collateral that are integral to the financial asset. The LGD is computed based on a workout style method. The workout style method is based on a set of derived estimated cash flows (i.e., collection or sale of collateral) during the workout period and discounted by the effective interest rate to the date of default.

EAD represents the expected exposure in the event of a default. The Bank derives the EAD from the current exposure to the counterparty and potential changes to the current amount allowed under the contract and arising from amortization. The EAD of a financial asset is its gross carrying amount at the time of default. For lending commitments, the EADs are potential future amounts that may be drawn under the contract, which are estimated based on historical observations and forward-looking forecasts. For some financial assets, EAD is determined by modelling the range of possible exposure outcomes at various points in time using scenario and statistical techniques.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

### 2.5 Summary of material accounting policy information (continued)

### 2.5.1 Financial assets and financial liabilities (continued)

### (g) Impairment (continued)

### Inputs, assumptions and techniques used for estimating ECL (continued)

As described above, and subject to using a maximum of a 12-month PD for Stage 1 financial assets, the Bank measures ECL considering the risk of default over the maximum contractual period (including any borrower's extension options) over which it is exposed to credit risk, even if, for credit risk management purposes, the Bank considers a longer period. The maximum contractual period extends to the date at which the Bank has the right to require repayment of an advance or terminate a loan commitment or guarantee.

### Restructured financial assets

If the terms of a financial asset are renegotiated or modified or an existing financial asset is replaced with a new one due to financial difficulties of the borrower, then an assessment is made of whether the financial asset should be derecognized and ECL is measured as follows:

- If the expected restructuring will not result in derecognition of the existing asset, then the expected cash flows arising from the modified financial asset are included in calculating the cash shortfalls from the existing asset.
- If the expected restructuring will result in derecognition of the existing asset, then the
  expected fair value of the new asset is treated as the final cash flow from the existing
  financial asset at the time of its derecognition. This amount is included in calculating
  the cash shortfalls from the existing financial asset that are discounted from the
  expected date of derecognition to the reporting date using the original effective
  interest rate of the existing financial asset.

### Credit-impaired financial assets

At each reporting date, the Bank assesses whether financial assets carried at amortized cost and debt financial assets carried at FVOCI are credit-impaired (referred to as 'Stage 3 financial assets'). A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or past due event;
- the restructuring of a loan or advance by the Bank on terms that the Bank would not consider otherwise;
- it is becoming probable that the borrower will enter bankruptcy or other financial reorganization; or,
- the disappearance of an active market for a security because of financial difficulties.

A loan that has been renegotiated due to a deterioration in the borrower's condition is usually considered to be credit-impaired unless there is evidence that the risk of not receiving contractual cash flows has reduced significantly and there are no other indicators of impairment. In addition, a loan that is overdue for 90 days or more is considered credit-impaired.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

### 2.5 Summary of material accounting policy information (continued)

### 2.5.1 Financial assets and financial liabilities (continued)

### (g) Impairment (continued)

Presentation of allowance for ECL in the statement of financial position

Allowance for ECL is presented in the statement of financial position for financial assets measured at amortized cost as contra-account from the gross carrying amount of the assets.

### Write-off

Loans are written off (either partially or in full) when there is no reasonable expectation of recovering a financial asset in its entirety or a portion thereof. This is generally the case when the Bank determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. This assessment is carried out at the individual asset level.

Recoveries of amounts previously written off are recognized in profit or loss.

Financial assets that are written off could still be subject to enforcement activities in order to comply with the Bank's procedures for recovery of amounts due.

### 2.5.2 Cash and cash equivalents

For statement of cash flows purposes, cash and cash equivalents consist of cash on hand, balances with other banks, and highly-liquid short-term investments with an original maturity of three months or less that are readily convertible to known amounts of cash and subject to an insignificant risk of changes in value.

Cash and cash equivalents are carried at amortized cost in the statement of financial position.

### 2.5.3 Equity

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of the ordinary share are recognized as a deduction from equity, net of any tax effects. Other shares are classified as equity and/or liability according to the economic substance of the particular instrument. Distributions to holders of a financial instrument classified as an equity instrument are charged directly to equity.

Retained earnings includes all current and prior period retained profits.

### 2.5.4 General and regulatory reserves

A general reserve is set up as necessary for any overall financial risk. The Board of Directors exercises its discretion for the use and maintenance of the general reserve. Any transfer from retained earnings to general reserve is subject to the approval of the Board of Directors.

Regulatory reserve is set up to account for the difference in provision between ECL determined in accordance with CIFRS 9, Financial Instruments, and the regulatory provision computed in accordance with NBC Prakas No. B7-017-344 dated 1 December 2017 and Circular No. B7-018-001 dated 16 February 2018 on credit risk classification and provision on impairment for BFIs.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

### 2.5 Summary of material accounting policy information (continued)

### 2.5.4 General and regulatory reserves (continued)

The regulatory provision requires BFIs to classify their loan portfolio into five classes and provide general and specific allowance based on the loan classification as follows:

Classification	Number of days past due	Allowance rate
Standard	0 to 14 days (short-term) 0 to 29 days (long-term)	1%
Special mention	15 days to 30 days (short-term) 30 days to 89 days (long-term)	3%
Substandard	31 days to 60 days (short-term) 90 days to 179 days (long-term)	20%
Doubtful	61 days to 90 days (short-term) 180 days to 359 days (long-term)	50%
Loss	From 91 days (short-term) 360 days or more (long-term)	100%

The Bank shall compare the provision calculated in accordance with CIFRS 9 and the regulatory provision, and:

- In case the regulatory provision is lower than provision calculated under CIFRS 9, the Bank shall record the provision calculated in accordance with CIFRS 9; and,
- In case the regulatory provision is higher than provision calculated under CIFRS 9, the Bank shall record the provision calculated in accordance with CIFRS 9 and transfer the difference from retained earnings to the regulatory reserve.

On 5 February 2025, NBC issued Circular No. B30-025-170 Sor Chor Nor on calculation of regulatory provision. The NBC requires all bank and financial institutions ("BFIs") to calculate regulatory provision using facility's gross carrying amount which include accrued interest receivables based on accounting standards in place, multiplying its respective rates determined by regulations (Standard 1%, Special Mention 3%, Substandard 20%, Doubtful 50% and Loss 100%). This is effective for 2024 audited financial statements and regulatory quarterly reporting starting from January 2025.

### 2.5.5 Deposits and placements with other banks

Deposits and placements with other banks are stated at cost less ECL.

2.5.6 Loans to customers

Loans to customers are initially measured at fair value plus adjustment on direct transaction costs, and subsequently at their amortized cost using the effective interest method.

2.5.7 Other investments

Other investments consist of equity and bond investments.

The equity investment represents the Bank's investment on unlisted equity securities designated as FVTPL and is valued at cost less any impairment.

The bond investments represent the Bank's investment on treasury bonds guaranteed by the Cambodian Government. These bond investments are valued at amortized cost and are held for the purpose of earning interest, and the cash flows are expected to be collected at a specific future period of time.

2.5.8 Other assets

Other assets are carried at cost less impairment, if any.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

### 2.5 Summary of material accounting policy information (continued)

### 2.5.9 *Property and equipment*

### (a) Recognition and measurement

Items of property and equipment are measured at cost less accumulated depreciation and any accumulated impairment losses.

Cost includes expenditures that are directly attributable to the acquisition of the asset and any other costs directly attributable to bringing the asset to working condition for its intended use, and the costs of dismantling and removing the items and restoring the site on which they are located. The cost of self-constructed assets also includes the cost of materials and direct labour. For qualifying assets, borrowing costs are capitalized in accordance with the accounting policy on borrowing costs.

Purchased software that is integral to the functionality of the related equipment is capitalized as part of that equipment.

When significant parts of an item of property and equipment have different useful lives, they are accounted for as separate items (major components) of property and equipment.

The gain or loss on disposal of an item of property and equipment is determined by comparing the proceeds from disposal with the carrying amount of property and equipment and is recognized net within "other income" and "other expenses" in profit or loss.

(b) Subsequent costs

The cost of replacing a component of an item of property and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the component will flow to the Bank, and its cost can be measured reliably. The carrying amount of the replaced component is derecognized to profit or loss. The costs of the day-to-day servicing of property and equipment are recognized in profit or loss as incurred.

(c) Depreciation

Depreciation is based on the cost of an asset less its residual value. Significant components of individual assets are assessed, and if a component has a useful life that is different from the remainder of that asset, then that component is depreciated separately.

Depreciation is recognized as an expense in profit or loss on a straight-line over the estimated useful lives of each component of an item of property and equipment.

Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Bank will obtain ownership by the end of the lease term.

Depreciation is recognized from the date that the property and equipment are installed and are ready for use, or in respect of internally-constructed assets, from the date that the asset is completed and ready for use. Construction in progress is not depreciated.

The estimated useful lives of property and equipment items are as follows:

Number of years

Office furniture and equipment	4 to 7
Computers	3 to 7
Motor vehicles	4 to 5
Leasehold improvements	Shorter of lease period and its economic life of 5 years

Depreciation method, useful lives and residual values are reassessed at end of the reporting period and adjusted if appropriate.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

### 2.5 Summary of material accounting policy information (continued)

### 2.5.10 Software costs

Software costs, comprising acquired computer software licenses and related costs, are stated at cost less accumulated amortization and any accumulated impairment. Acquired computer software licenses are capitalized on the basis of the costs incurred to acquire the specific software and bring it to use.

Software costs are depreciated on a straight-line basis over an estimated 10-year useful life.

Costs associated with the development or maintenance of computer software are recognized as expense when incurred.

2.5.11 Leases

At inception of a contract, the Bank assesses whether a contract is, or contains, a lease, if the contract conveys the right to control the use of an identified asset for period of time in exchange for consideration.

To assess whether a contract conveys the right to control the use of an identified asset, the Bank assesses whether:

- the contract involves the use of an identified asset this may be specified explicitly or implicitly, and should be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has a substantive substitution right throughout the period of use, then the asset is not identified;
- the Bank has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and,
- the Bank has the right to direct the use of the asset. The Bank has this right when it has the decision-making rights that are most relevant to changing how and for what purpose the asset is used. In cases where all the decisions about how and for what purpose the asset is used are predetermined, the Bank has the right to direct the use of the asset if either:
  - i) the Bank has the right to operate the asset; or,
  - ii) the Bank designed the asset in a way that predetermined how and for what purpose it will be used.

At inception or on reassessment of a contract that contains a lease and non-lease component, the Bank allocates the consideration in the contract to each lease component and aggregate of non-lease components on the basis of their relative stand-alone prices. However, for the leases of land and buildings in which it is a lessee, the Bank has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

### Leases in which the Bank is a lessee

An arrangement conveys the right to use an asset if one of the following is met:

- the purchaser has the ability or right to operate the asset while obtaining or controlling more than an insignificant amount of the output; or,
- the purchaser has the ability or right to control physical access to the asset while obtaining or controlling more than an insignificant amount of the output.

Facts and circumstances indicated that it is remote that other parties would take more than an insignificant amount of the output, and the price per unit was neither fixed per unit of output nor equal to the current market price per unit of output.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

### 2.5 Summary of material accounting policy information (continued)

### 2.5.11 Leases (continued)

### Leases in which the Bank is a lessee (continued)

The Bank recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The estimated useful lives of right-of-use assets comprising leases of head office, branch offices and ATM locations range between 14 months to 15 years.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the lessee's incremental borrowing rate. Generally, the Bank uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprise:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and,
- the exercise price under a purchase option that the Bank is reasonably certain to exercise, lease payments in an optional renewal period if the Bank is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Bank is reasonably certain not to terminate early.

The lease liability is measured at amortized cost using the effective interest method. It is remeasured when there is a change in the lease term, a change in the assessment of the option to purchase the underlying asset, a change in future lease payments arising from a change in an index or rate, or if there is a change in the Bank's estimate of the amount expected to be payable under a residual value guarantee.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Bank presents right-of-use assets and lease liabilities separately in the statement of financial position.

### Short-term leases and leases of low-value assets

The Bank has elected not to recognize right-of-use assets and lease liabilities for short-term leases (i.e., lease term of 12 months or less) and leases of low-value assets. The Bank recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

### 2.5 Summary of material accounting policy information (continued)

### 2.5.12 Employee benefits

### (a) Short-term employee benefits

The Bank recognizes a liability and a provision for short-term employee benefits where it is contractually obliged or where there is a past practice that has created a constructive obligation.

Wages, salaries, bonuses, and other short-term benefits are recognized as an expense in the year in which the associated services are rendered by employees of the Bank.

#### (b) Post-employment benefits

The post-employment benefits consist of the Bank's liability to employees for provident fund, seniority indemnity payment and unpaid annual leave which are considered as defined benefit obligations.

### Provident fund

The Bank provides its employees with benefits under the provident fund policy. Employees who complete their probation have an option to participate in the provident fund scheme. The fund is sourced from the following:

- Employees may contribute up to 5.00% of their monthly salary, and the Bank contributes twice that amount.
- The Bank contributes interest on the cumulative balance of the provident fund computed at 6.50% per annum.

The Bank's contributions are charged to profit or loss during the year the employees rendered their services. The provident fund will be paid to employees (who have contributed to the fund) upon their retirement, resignation or termination of employment.

Upon retirement or resignation, the employee's contribution and related interest are paid in full while the Bank's contribution and related interest are paid in accordance with the following conditions:

Years of service	Bank's % of contribution
Equal to or less than 1 year	-
Worked for at least 1 year	20.00
Worked for at least 2 years	40.00
Worked for at least 3 years	60.00
Worked for at least 4 years	80.00
Worked for at least 5 years	100.00

Those who have been terminated due to serious misconduct are only entitled to his/her contribution plus interest, regardless of how long they have been employed by the Bank.

### Seniority indemnity payment

In 2018, the Ministry of Labour and Vocational Training's ("MoLVT") Prakas No. 443 dated 21 September 2018 mandated the payment of seniority indemnity for unspecified duration contracted employees with implementation guidelines issued on 22 March 2019. The said Prakas requires retroactive seniority payment equal to fifteen days per year of employee service for a maximum not exceeding 6 months based on the average net wages for each year.

Payment shall be spread every June and December of each year as follows:

- equal to three days payable every June; and,
- equal to three days payable every December.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

### 2.5 Summary of material accounting policy information (continued)

### 2.5.12 Employee benefits (continued)

(b) Post-employment benefits (continued)

### Unpaid annual leave

The Bank provides its active employees with benefits under unpaid annual leave benefit plan. Unused annual leave could be brought forward by certain amount depending on year of service. The total unused annual leaves will be paid based on the salary at the time of leaving the Bank.

Year of service	Annual leave days
1 to 3 years	18 days per year (max forward a year = 6 days)
4 to 6 years (from 3 years and 1 day up)	19 days per year (max forward a year = 7 days)
7 to 9 years (from 6 years and 1 day up)	20 days per year (max forward a year = 8 days)
10 years and above (from 9 years and 1 day up)	21 days per year (max forward a year = 9 days)

At the end of each reporting period, the provident fund, seniority indemnity payment and unpaid annual leave are reassessed following actuarial valuation performed by the Bank's independent actuaries using the projected unit credit method. The liability with respect to provident fund, seniority indemnity payment and unpaid annual leave is regarded as fully accrued, and, therefore, is not split between a past (or accrued) and future in-service element. The net defined benefit liability is recognized at the present value of the obligation.

### 2.5.13 Deposit liabilities

Deposit liabilities are stated at amounts in which they are to be paid. Interest is accrued periodically and recognized in a separate liability account before recognizing as part of deposit liabilities.

### 2.5.14 Provisions

Provisions are recognized in the statement of financial position when the Bank has a legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation. If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. The unwinding of the discount is recognized as finance cost.

### 2.5.15 Interest

### Effective interest rate

Interest income and expense are recognized in profit or loss using the effective interest method. The 'effective interest rate' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- the gross carrying amount of the financial asset; or,
- the amortized cost of the financial liability.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

### 2.5 Summary of material accounting policy information (continued)

### 2.5.15 Interest (continued)

### Effective interest rate (continued)

When calculating the effective interest rate for financial instruments other than purchased or originated credit-impaired assets, the Bank estimates future cash flows considering all contractual terms of the financial instrument, but not ECL. For purchased or originated credit-impaired financial assets, a credit-adjusted effective interest rate is calculated using estimated future cash flows including ECL.

The calculation of the effective interest rate includes transaction costs and fees that are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or financial liability.

### Amortized cost and gross carrying amount

The 'amortized cost' of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition minus the principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between the initial amount and the maturity amount and, for financial assets, adjusted for any ECL allowance.

The 'gross carrying amount of a financial asset' is the amortized cost of a financial asset before adjusting for any ECL allowance.

### Calculation of interest income and expense

The effective interest rate of a financial asset or financial liability is calculated on initial recognition of a financial asset or a financial liability. In calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortized cost of the liability. The effective interest rate is revised as a result of periodic re-estimation of cash flows of floating rate instruments to reflect movements in market rates of interest. The effective interest rate is also revised for fair value hedge adjustments at the date amortization of the hedge adjustment begins.

However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the amortized cost of the financial asset. If the asset is no longer credit-impaired, then the calculation of interest income reverts to the gross basis.

For financial assets that were credit-impaired on initial recognition, interest income is calculated by applying the credit-adjusted effective interest rate to the amortized cost of the asset. The calculation of interest income does not revert to a gross basis, even if the credit risk of the asset improves.

### Presentation

Interest income and interest expense determined using the effective interest method are recognized in profit or loss.

### 2.5.16 Fee and commission

Fee and commission income and expense that are integral to the effective interest rate of a financial asset or financial liability are included in the effective interest rate.

Other fees and commission income, including account servicing fees, are recognized as the related services are performed.

A contract with a customer that results in a recognized financial instrument in the Bank's financial statements may be partially in scope of CIFRS 9 and partially in scope of CIFRS 15, Revenue from Contracts with Customers. If this is the case, then the Bank first applies CIFRS 9 to separate and measure the part of the contract that is in scope of CIFRS 9 and then applies CIFRS 15, to the residual.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

### 2.5 Summary of material accounting policy information (continued)

### 2.5.17 Dividend income

Dividend income is recognized when the Bank's right to receive the payment is established.

### 2.5.18 Impairment of non-financial assets

The carrying amounts of the Bank's non-financial assets, other than inventories, contract assets and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. For intangible assets that have indefinite useful lives or that are not yet available for use, the recoverable amount is estimated each year at the same time.

An impairment loss is recognized if the carrying amount of an asset or its related cashgenerating unit ("CGU") exceeds its estimated recoverable amount.

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

For the purpose of impairment testing, assets that cannot be tested individually are grouped together with the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs.

Impairment losses are recognized in profit or loss. Impairment losses recognized in respect of CGUs are allocated first to reduce the carrying amount of any goodwill allocated to the CGUs, and then to reduce the carrying amounts of the other assets in the CGUs on a pro rata basis.

With the exception of goodwill, impairment losses recognized in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

### 2.5.19 Income tax

Income tax expense comprises current and deferred tax. It is recognized in profit or loss except for items that are recognized directly in equity or in OCI.

The Bank has determined that interest and penalties related to income taxes, including uncertain tax treatments, do not meet the definition of income taxes, and therefore has accounted for them under Cambodian International Accounting Standard ("CIAS") 37, Provisions, Contingent Liabilities and Contingent Assets, and has recognized the related expenses in 'Other expenses'.

Following the adoption of CIFRSs, the General Department of Taxation ("GDT") has not indicated the changes to tax bases for tax computations for the tax effects of transition to CIFRSs. The Bank have exercised judgment in determining tax payable and deferred taxes. The use of different assumptions could lead to a material impact on the financial statements. The final tax liabilities and deferred taxes of the Bank are subject to the determination of the GDT.

### (i) Current tax

Current tax comprises the expected tax payable or receivable on the taxable income for the period using tax rates enacted or substantially enacted at the reporting date, and any adjustment to tax payable in respect of previous period.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

### 2.5 Summary of material accounting policy information (continued)

### 2.5.19 Income tax (continued)

(ii) Deferred tax

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax assets are recognized for unused tax losses and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be used. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized; such reductions are reversed when the probability of future taxable profits improves. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow the manner in which the Bank expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset only if certain criteria are met.

2.5.20 Goodwill

Goodwill is initially measured at cost (being the excess of the aggregate of the consideration transferred and the amount recognized for non-controlling interests and any previous interest held over the net identifiable assets acquired and liabilities assumed). If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Bank reassesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognized at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognized in profit or loss.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill is required to be tested at least annually for impairment. For purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Bank's CGUs that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Where goodwill has been allocated to a CGU and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the CGU retained.

### 2.5.21 Contingent liabilities

Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is not recognized in the statement of financial position and is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote. Possible obligations, whose existence will only be confirmed by the occurrence or non-occurrence of one or more future events, are also disclosed as contingent liabilities, unless the probability of outflow of economic benefits is remote.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

### 2.5 Summary of material accounting policy information (continued)

### 2.5.22 Contingent assets

Contingent assets usually arise from unplanned or other unexpected events that give rise to the possibility of an inflow of economic benefits to the Bank. Contingent assets are not recognized in financial statements since this may result in the recognition of income that may never be realized. However, when the realization of income is virtually certain, then the related asset is not a contingent asset and its recognition is appropriate.

### 2.5.23 Related parties

A related party is a person or entity that is related to the Bank. A related party transaction is a transfer of resources, services or obligations between the Bank and its related party, regardless of whether a price is charged.

- a. A person or a close member of that person's family is related to the Bank if that person:
  - i. Has control or joint control over the Bank;
  - ii. Has significant influence over the Bank; or,
  - iii. Is a member of the key management personnel of the Bank.
- b. An entity is related to the Bank if any of the following conditions applies:
  - i. The entity and the Bank are members of the same group.
  - ii. One entity is an associate or joint venture of the other entity.
  - iii. Both entities are joint ventures of the same third party.
  - iv. One entity is a joint venture of a third entity and the other entity is an associate of the third entity.
  - v. The entity is a post-employment benefit plan for the benefits of employees of either the Bank or an entity related to the Bank.
  - vi. The entity is controlled or jointly-controlled by a person identified in a. above.
  - vii. A person identified in a.i. above has significant influence over the entity or is a member of the key management personnel of the ultimate holding company or the entity.
  - viii. The entity, or any member of a group of which it is a part, provides key management personnel services to the Bank or to the parent of the Bank.

### 2.5.24 Rounding of amounts

Amounts in the financial statements have been rounded off to the nearest dollar and nearest thousand KHR for US\$ and KHR amounts, respectively.

### 2.5.25 Events after the reporting period

The Bank identifies events after the end of each reporting period as those events, both favourable and unfavourable, that occur between the end of the reporting period and the date when the financial statements are authorized for issue. The financial statements of the Bank are adjusted to reflect those events that provide evidence of conditions that existed at the end of the reporting period. Non-adjusting events after the end of the reporting period are disclosed in the notes to the financial statements when material.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

### 2.6 Significant accounting judgments and estimates

The preparation of the financial statements in accordance with CIFRSs requires the Bank to make estimates and assumptions that affect the reported amounts of resources, liabilities, income and expenses and the disclosures of contingent resources and contingent liabilities. Future events may occur which can cause the assumptions used in arriving the estimates to change. The effects of any change in estimates are reflected in the financial statements as they become reasonably determinable.

### 2.6.1 Judgments

The following are the critical judgments and key assumptions that have a significant risk of material adjustment to the carrying amounts of assets and liabilities within the next financial year:

### Classification of financial assets

The Bank classifies its financial assets depending on the business model for managing those financial assets and whether the contractual terms of the financial asset are SPPI on the principal amount outstanding. The Bank performs the business model assessment based on observable factors such as:

- performance of the business model and the financial assets held within that business model are evaluated and reported to the Bank's Management;
- risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed;
- compensation of business units whether based on the fair value of the assets managed or on the contractual cash flows collected; and,
- expected frequency, value and timing of sales.

In performing the SPPI test, the Bank applies judgment and considers relevant factors such as the currency in which the financial asset is denominated, the period for which the interest rate is set, contingent events that would change the amount and timing of cash flows, leverage features, prepayment and extension terms and other features that may modify the consideration for the time value of money.

### Fair value of financial instruments

Where the fair values of financial assets and financial liabilities recorded in the statement of financial position or disclosed in the notes to financial statements cannot be derived from active markets, these are determined using internal valuation techniques using generally accepted market valuation models. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values.

### Leases

The evaluation of whether an arrangement contains a lease is based on its substance. An arrangement is, or contains, a lease when the fulfilment of the arrangement depends on a specific asset or assets and the arrangement conveys the right to use the asset.

In assessing whether leases are of low-value, Management considers the economic substance of the underlying asset as a whole.

### Extension and termination options

The Bank determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.
NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

#### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

#### 2.6 Significant accounting judgments and estimates (continued)

#### 2.6.1 Judgments (continued)

#### Extension and termination options (continued)

The Bank has several lease contracts that include extension and termination options. The Bank applies judgment in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors such as leasehold improvements and location that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Bank reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate.

#### 2.6.2 Estimates

#### ECL on financial assets

The Bank's ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgments and estimates include, among others:

- segmentation of the portfolio, where the appropriate model or ECL approach is used;
- criteria for assessing if there has been a significant increase in credit risk and the allowance for debt financial assets should be measured on a lifetime ECL basis and the qualitative assessment;
- segmentation of debt financial assets when their ECL is assessed on a collective basis and on an individual basis for significant customer as defined by the Bank's Management;
- development of ECL models, including the various formulas and the choice of inputs;
- determination of associations between macroeconomic scenarios and economic inputs and the effect on PDs, EADs and LGDs; and,
- selection of forward-looking macroeconomics scenarios and their probability weightings, to derive the economic inputs into the ECL models.

#### Recognition of deferred tax assets

Deferred tax assets are recognized for all unused tax losses and temporary differences to the extent that it is probable that future taxable profit will be available against which the losses can be utilized. Significant estimate is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and level of future taxable income together with future tax planning strategies.

#### Income tax expense

The taxation system in Cambodia is characterized by numerous taxes and frequently changing legislation, which is subject to interpretation. Taxes are subject to review and investigation by a number of authorities, which are empowered by law to impose fines, penalties and interest charges.

These factors may create potential tax exposures for the Bank. The Management believes that they have understood relevant tax regulations and adequately provided for tax liabilities based on their interpretation of the current tax legislation. However, where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the tax amount reported in the period in which such determination is made.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

#### 2. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

#### 2.6 Significant accounting judgments and estimates (continued)

#### 2.6.2 *Estimates* (continued)

#### Defined benefit obligations

The present value of the defined benefit obligation depends on a number of factors that are determined by Management using a number of assumptions. The assumptions used in determining the net cost for defined benefits. Any changes in these assumptions will impact the value of defined benefit obligation.

#### 2.7 Adoption of amended accounting standards

#### 2.7.1 Amendments to CIFRSs issued and adopted by the Bank

The Bank has applied the following amendments for the first time for their annual reporting period commencing on 1 January 2024:

- Amendments to CIAS 1, Non-current Liabilities with Covenants
- Amendments to CIAS 7 and CIFRS 7, Supplier Finance Arrangements
- Amendments to CIFRS 16, Lease Liability in a Sale and Leaseback

The amendments listed above did not have any significant impact on the amounts recognized in prior, the current or future periods.

#### 2.7.2 Standards and amendments to CIFRSs issued but not yet effective

The new and amended standards that are issued, but not yet effective or early adopted by the Bank that are not expected to have material impact, up to the date of issuance of the financial statements are disclosed below:

Effective beginning on or after 1 January 2025

Amendments to CIAS 21, Lack of exchangeability

Effective beginning on or after 1 January 2026

- Amendments to CIFRS 9 and CIFRS 7, Classification and Measurement of Financial Instruments
- Annual Improvements to CIFRS Accounting Standards Volume 11

Effective beginning on or after 1 January 2027

- CIFRS 18, Presentation and Disclosure in Financial Statements
- CIFRS 19, Subsidiaries without Public Accountability: Disclosures

Effective date deferred indefinitely

• Amendments to CIFRS 10, Consolidated Financial Statements, and CIAS 28, Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 3. CASH ON HAND

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

#### 4. BALANCES WITH THE NATIONAL BANK OF CAMBODIA (continued)

#### (i) Short-term deposits

Annual interest rates of short-term deposits are as follows:

	2024	2023
Currency	in US\$	in US\$
Term		
3 months	1.00%	-
6 months	1.15% to 1.16%	0.90%
12 months	-	1.08% to 3.63%

#### (ii) Capital guarantee

Under NBC Prakas No. B7-01-136 dated 15 October 2001, banks are required to maintain a statutory deposit of 10% of registered capital with the NBC. This deposit is not available for use in the Bank's day-to-day operations but is refundable when the Bank voluntarily ceases to operate the business in Cambodia. The capital guarantee deposit earned interest at rate of 1.29% and 1.31% per annum for first and second semester, respectively (2023: 1.19% and 1.33% per annum).

#### (iii) Reserve requirements

Under NBC Prakas No. B7-020-230 dated 18 March 2020, commercial banks are required to maintain certain cash reserves with the NBC in the form of compulsory deposits, computed at 7.0% of customer deposits and borrowings in KHR and other currencies.

On 9 January 2023, the NBC issued Prakas No. B7-023-005 to announce the change in the reserve requirement rates as follows:

- Effective from 1 January 2023 to 31 December 2023, reserve requirements maintained in foreign currencies shall be calculated at 9% of total deposits and borrowings; and
- Effective from 1 January 2024, reserve requirements maintained in foreign currencies shall be calculated at 12.5% of total deposits and borrowings.
- The reserve requirement for local currencies remained the same.

On 23 November 2023, the NBC responded a letter to the Association of Banks in Cambodia allowing commercial banks to maintain reserve requirement in foreign currencies at rate of 7% until 31 December 2024. On 21 August 2024, the NBC sent a letter to all financial institutions to continue maintain reserve requirement in foreign currencies at rate of 7% until 31 December 2025.

During the year, interest income from balance with the NBC amounted to US\$ 1,081,018 or KHR'000 4,400,824 (2023: US\$ 777,375 or KHR'000 3,195,011) (see Note 21).

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### 5. BALANCES WITH OTHER BANKS

Balances with other banks are held as follows:

	31 December 2024		31 Decen	nber 2023
	US\$	KHR'000	US\$	KHR'000
		(Note 2.4)		(Note 2.4)
			(As restated	I – Note 34)
Current accounts	37,061,882	149,174,075	36,527,724	149,215,753
Savings accounts	83,146	334,663	82,354	336,415
Short-term deposits with original				
term				
less than 3 months	33,095,863	133,210,849	17,578,164	71,806,802

Annual interest rates	40.4	23% - 12.31%	40	23% - 12.31%
Annual Interest fates	10.	25/0 - 12.3170	10.	25/0 - 12.5170

During the year, interest expense on subordinated debts amounted to US\$ 13,040,984 or KHR'000 53,089,846 (2023: US\$ 14,649,741 or KHR'000 60,210,436) (see Note 22).

The Bank's subordinated debt agreements are subject to covenant clauses, whereby the Bank is required to meet certain key financial ratios. During the year, the Bank did not meet certain financial ratios. As at 31 December 2024, The Bank received a waiver from lenders for the covenant violation. The waiver allows the Bank to remain in compliance with the subordinated debt agreement for the year ending 31 December 2024.

\* Accrued expenses include unpaid professional fees, utilities, and other miscellaneous expenses. These are non-interest bearing and are payable on demand. The accrual on the professional fees includes audit service fees amounting to US\$ 16,500 or KHR'000 66,413.

Terms and conditions of the above financial liabilities:

- Trade payables are non-interest bearing and are normally settled by the Bank on 60-day terms, including those trade payables that are included in the Bank's supplier finance arrangement
- > Other payables are non-interest bearing and have an average term of six months
- > Interest payable is normally settled quarterly throughout the financial year
- > For terms and conditions with related parties.

#### 17. EMPLOYEE BENEFITS (continued)

The following is a summary of the defined benefit obligations in US\$, with different discount rate, salary growth rate and turnover rate assumptions:

		2024			2023	
		Seniority	Unpaid		Seniority	Unpaid
Assumptions	Provident fund	indemnity pay	annual leave	Provident fund	indemnity pay	annual leave
	US\$	US\$	US\$	US\$	US\$	US\$
Discount rate						
Baseline assumption - 6% per annum	19,758,556	162,131	1,834,835	19,470,329	199,492	1,765,781
+ 0.5%	19,314,181	157,659	1,806,284	19,029,865	195,968	1,737,043
- 0.5%	20,226,848	166,779	1,864,625	20,395,903	206,808	1,825,475
Salary growth						
Baseline assumption - 6% per annum	19,758,556	162,131	1,834,835	19,470,329	199,492	1,765,781
+ 0.5%	19,850,983	162,131	1,811,446	19,561,943	199,492	1,789,323
- 0.5%	19,669,213	162,131	1,812,223	19,291,002	199,492	1,720,088
Turnover rate						
Baseline assumption - 15% - 30%						
depending on seniority	19,758,556	162,131	1,834,835	19,470,329	199,492	1,765,781
+ 0.5%	19,750,746	196,390	1,845,166	19,462,588	194,968	1,776,180
- 0.5%	19,766,532	168,088	1,824,108	19,485,982	208,925	1,744,709

The above has been determined based on a method that extrapolates the impact on the defined benefit obligations as a result of reasonable changes in key assumptions occurring at the end of the reporting period. The sensitivity analyses are based on a change in a significant assumption, keeping all other assumptions constant. The sensitivity analysis may not be representative of an actual change in the defined benefit obligations as it is unlikely that changes in assumptions would occur in isolation from one another.

The following are the expected payments or contributions in US\$ to the defined benefit plan in future years:

	Provident fund	Seniority indemnity pay	Unpaid annual leave
	US\$	US\$	US\$
2025 2026 to 2029	2,795,263 43,831,593	39,239 170,179	431,745 2,742,105

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

#### 18. INCOME TAX

Major components of income tax expense are as follows:

Deferred tax	1,974,149	8,036,761	3,392,771	13,944,289
_	1,974,149	8,036,761	3,212,380	13,202,882

#### (a) Income tax expenses

In accordance with the Cambodian tax regulations, current income tax is calculated at the higher of the taxable income for the year multiplied by the tax rate of 20% at the reporting date and 1% of annual turnover.

Cambodia's Ministry of Economy and Finance issued guidance on 4 July 2017 (Prakas 638) that clarifies the conditions that must be fulfilled for an enterprise to qualify for an exemption from the 1% minimum tax on turnover. This exemption will be available only to taxpayers that comply with stringent rules governing the maintenance of proper accounting records.

On 13 September 2023, the Bank received certificate of proper accounting records from the General Department of Taxation ("GDT") of Cambodia for tax years 2023 and 2024, exempting the bank from paying minimum tax.

	202	24	2023

	US\$	KHR'000 (Note 2.4)	US\$	KHR'000 (Note 2.4)
As at 1 January Charged to profit or loss	1,303,398 (1,974,149)	5,324,381 (8,036,761)	4,696,169 (3,392,771)	19,334,128 (13,944,289)
Currency translation difference		12,607	-	(65,458)
As at 31 December	(670,751)	(2,699,773)	1,303,398	5,324,381

#### (c) Tax losses carried forward

In accordance with the Prakas No. 098 on Tol, for the tax losses to be carried forward for a period of five consecutive years and utilized against taxable profit in subsequent years, the following conditions should be met:

- Tax loss has been calculated based on the tax rules and reported in the annual tax return to the GDT;
- The business activity of the Company must not have changed; and
- No tax unilateral reassessment on the tax losses has been made by the GDT.

Tax loss is subject to assessment by GDT and may not be utilized if one of the criteria mentioned above will not be met.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

#### **18. INCOME TAX** (continued)

#### (c) Tax losses carried forward (continued)

The details of the Bank's unused tax losses are as follows:

Originating year	Can be utilized up to	Tax loss amount US\$	Utilized US\$	Forfeited US\$	Unutilized US\$
2023 2024	2028 2029	16,466,772 42,669,006	-	-	16,466,772 42,669,006
		59,135,778			59,135,778

#### (d) Income tax payable

Details of movements in income tax payable are as follows:

	2024		2023	
	US\$	KHR'000 (Note 2.4)	US\$	KHR'000 (Note 2.4)
		(11010 2.4)	(As restated	d – Note 34)

#### Legal claims recovery

During the year, the Bank pursued legal claims against borrowers in default. Majority of these claims are still being negotiated and/or disputed by borrowers, thus, neither the ultimate outcome of these claims nor the amounts recoverable can be determined at this time.

#### Tax contingency

The taxation system in Cambodia has undergone numerous changes and is characterised by either unclear, contradictory and/or differing interpretations existing among numerous taxation authorities and jurisdictions. Taxes are subject to review and investigation by a number of authorities, who are enabled by law to impose severe fines, penalties and interest charges. These facts may create tax risks in Cambodia substantially more significant than in other countries.

Management believes that it has adequately provided for tax liabilities based on its interpretation of tax legislations. However, the relevant authorities may have differing interpretations and the effects since the incorporation of the Bank could be significant.

### 30. FINANCIAL RISK MANAGEMENT

The Bank has exposure to the following risks from financial instruments:

- Operational risk;
- Credit risk;
- Market risk; and,
- Liquidity risk

### Risk management functional and governance structure

The Bank's activities expose it to a variety of financial risks: credit risk, market risk (including currency risk, interest rate risk and price risk) and liquidity risk. Taking risk is core to the financial business and the operational risks are an inevitable consequence of being in business.

The Bank does not use derivative financial instruments such as foreign exchange contract and interest rate swaps to manage its risk exposure.

A primary objective of the Bank in risk management is to comply with the NBC's regulations. On the other hand, the Bank has recognized the importance of achieving international best practices on risk management. The Board of Directors has established a Credit Committee to formulate broad parameters of acceptable risk for the Bank and monitor the activities against these parameters.

The details of financial assets and liabilities are as follows:

	31 Decen	ber 2024	31 December 2023

\* This excludes unearned income and provision for ECL on credit commitments and financial guarantee contracts.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### **30. FINANCIAL RISK MANAGEMENT** (continued)

### 30.1 Operational risk

Operational risk is the risk of direct or indirect loss arising from inadequate or failed internal processes, personnel, technology and infrastructure, and from external factors other than credit, market and liquidity risks such as those arising from legal and regulatory requirements and generally accepted standards of corporate behaviour.

The operational risk loss is managed through established operational risk management processes, proper monitoring and reporting of the business activities by control and support units which are independent of the business units and oversight provided by the senior management of the Bank.

The Bank's operational risk management entails the establishment of clear organizational structures, roles and control policies. Various internal control policies and measures have been implemented including the establishment of signing authorities, defining system parameters' controls, streamlining procedures and documentation and compliance with regulatory and other legal requirements. These are continually reviewed to address the operational risks of the business unit as well as to assess the level of compliance with the Bank policies by a program of periodic reviews undertaken by the internal audit function. The results of internal audit reviews are discussed with the management of the business unit to which they relate, with summaries submitted to the Audit Committee and senior management of the Bank.

### 30.2 Credit risk

The Bank takes on exposure to credit risk, which is the risk that a counterparty will cause a financial loss to the Bank by failing to discharge an obligation. Credit risk is the most important risk for the Bank's business. Credit exposure arises principally in lending activities that lead to loans to customers. There is also credit risk in off-balance sheet financial instruments, such as loan commitments. The lending activities are guided by the Bank's credit policy to ensure that the overall objectives in the area of lending are achieved (i.e., the loans portfolio is strong and credit risks are well diversified). The credit policy documents the lending policy, collateral policy and credit approval processes, including the Bank's own internal grading system, and procedures implemented to ensure compliance with the NBC's guidelines.

#### Credit risk measurement

The Bank assesses the probability of default of individual counterparties using internal rating tool. Local Credit Committee is responsible for determining the risk rating policies.

Risk ratings are reviewed and updated regularly, and in events of (i) change of loan terms and conditions, including extension, (ii) repayment irregularities or delinquencies, and (iii) adverse information relating to the borrower or transaction.

#### Risk limit control and mitigation policies

The Bank operates and provides loans to individuals or enterprises within the Kingdom of Cambodia. The Bank manages, limits and controls the concentration of credit risk whenever it is identified. Large exposure is defined by the NBC as overall credit exposure to any individual beneficiary which exceeds 10.00% of the Bank's net worth.

The Bank is required, under the conditions of NBC Prakas No. B7-06-226, to maintain at all times a maximum ratio of 20.00% between the Bank's overall credit exposure to any single beneficiary's net worth. The aggregate of large credit exposure must not exceed 300.00% of the Bank's net worth.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

# **30. FINANCIAL RISK MANAGEMENT** (continued)

### 30. 2 Credit risk (continued)

### Management of credit risk

Developing and maintaining the Bank's processes for measuring ECL: This includes processes for:

- initial approval, regular validation and back-testing of the models used;
- determining and monitoring significant increase in credit risk; and,
- incorporation of forward-looking information.

Reviewing compliance of business units with agreed exposure limits, including those for selected industries, country risk and product types. Regular reports on the credit quality of local portfolios are provided to the Bank's Credit Committee, which may require appropriate corrective action to be taken. These include reports containing ECL allowance estimation.

Providing advice, guidance and specialist skills to business units to promote best practice throughout the Bank in the management of credit risk. The Bank employs a range of policies and practices to mitigate credit risk. The most traditional of these is the taking of security in the form of collateral for loans to customers, which is a common practice. The Bank implements guidelines on the acceptability of specific classes of collateral or credit risk mitigation. The principal collateral types to secure for loans to customers are:

- mortgages over residential properties (land, building and other properties);
- charges over business assets such as land and buildings; and,
- cash in the form of margin deposits.

#### Concentration of risk

The Bank monitors concentration of credit risk of its counterparties by industry. An analysis of concentration of the credit risk as at the balance sheet date is shown below.

### Maximum exposure to credit risk before collateral held or other credit enhancements

Details of maximum exposure to credit risk before collateral held or other credit enhancements are as follows:

	31 Decen	nber 2024	31 December 2023

# **30. FINANCIAL RISK MANAGEMENT** (continued)

# 30. 2 Credit risk (continued)

#### Concentration of risks of financial assets with credit risk exposure

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Bank's performance to developments affecting a particular industry or geographic location.

The Bank applies a three-stage approach based on the change in credit quality since initial recognition. Allowance for impairment will be made based on the following three-stage approach which reflects the change in credit quality of the financial instrument since initial recognition.

#### (i) Stage 1: 12-month ECL – not credit-impaired

For exposures where there has not been a significant increase in credit risk since initial recognition and that are not credit-impaired upon origination, the ECL associated with the probability of default events occurring within next 12 months will be recognized.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### **30. FINANCIAL RISK MANAGEMENT** (continued)

#### 30. 2 Credit risk (continued)

Credit quality (continued)

### (ii) Stage 2: Lifetime ECL – not credit-impaired

For exposures where there has been a significant increase in credit risk since initial recognition but that are not credit-impaired, a lifetime ECL will be recognized.

# (iii) Stage 3: Lifetime ECL – credit-impaired

Financial assets are assessed as credit-impaired when one or more events that have detrimental impact on the estimated future cash flows of that asset have occurred. For financial assets that are credit-impaired, a lifetime ECL will be recognized.

Stage	Credit risk status	Default indicator
1 2 3	12-month ECL – not credit-impaired Lifetime ECL – not credit-impaired Lifetime ECL – credit-impaired	0 to 30 DPD 31 to 90 DPD More than 90 DPD Restructured and rescheduled Forced default
		Related default

The definition of default used for these purposes shall be applied consistently to all financial assets unless information becomes available that demonstrates that another default definition is more appropriate for a particular financial instrument.

Based on the Bank's definition of default, an account classified as default will be automatically tagged as "Yes" in the "Impairment indicator" field when the "Default reason" field shows one of the four default reasons below.

- (a) *Normal turn:* The account's delinquency exceeds 90 DPD and is applicable to all products except trade finance product which has a definition of default of 31 DPD due to the short-term nature of the product.
- (b) *Restructured and rescheduled:* When the account undergoes debt restructuring or rescheduling;
- (c) *Forced:* When an account shows deterioration in its credit profile, but its delinquency does not exceed 90 DPD; and,
- (d) *Related:* Refers to cross default by obligor(s) of the same borrower type within the same loan listing source.

#### (iv) Incorporation of forward-looking information

The Bank incorporates forward-looking information into both the assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and the measurement of ECL.

External information considered includes economic data and forecasts published by governmental bodies and monetary authorities in the countries where the Bank operates, supranational organizations, such as the International Monetary Fund, and selected private-sector and academic forecasters.

The Bank has identified and documented key drivers of credit risk and credit losses for each portfolio of financial instruments in accordance with each country and, using an analysis of historical data, has estimated relationships between macro-economic variables and credit risk and credit losses.

#### Repossessed collateral

During the year, the Bank did not repossess any collateral held as security.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### **30. FINANCIAL RISK MANAGEMENT** (continued)

### 30.3 Market risk

The Bank takes on exposure to market risk, which is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk arises from open positions in interest rates, currency and equity products, all of which are exposed to general and specific market movements and changes in the level of volatility of market rates or prices such as interest rates, credit spreads, foreign exchange rates and equity prices.

The Bank does not use derivative financial instruments such as foreign exchange contract and interest rate swaps to hedge its risk exposure.

#### Foreign exchange risk

Foreign exchange risk arises from future commercial transactions and recognized assets and liabilities denominated in a currency that is not the Bank's functional currency. The Bank maintains a policy of not exposing itself to large foreign exchange positions. Any foreign currency exchange open positions are monitored against the operating requirements, predetermined position limits and cut-loss limits.

The balances of monetary assets and liabilities denominated in currencies other than US\$ are not significant, therefore, no sensitivity analysis for foreign exchange risk was presented.

### Price risk

The Bank is not exposed to price risk of securities because it does not hold any investments classified in the statement of financial position as marketable securities.

#### Interest rate risk

Interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Interest margins may increase as a result of changes and may reduce losses in the event that unexpected movements arise. The Management of the Bank at this stage does not have a policy to set limits on the level of mismatch of interest rate re-pricing that may be undertaken; however, Management regularly monitors the mismatch.

The Bank has no significant financial assets and liabilities with floating interest rates. Balances with the NBC, balances with other banks, loans to customers, deposits from customers and other financial institutions, borrowings and subordinated debts have fixed interest rates and are interest bearing assets and liabilities.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

### **30. FINANCIAL RISK MANAGEMENT** (continued)

### 30.4 Liquidity risk

Liquidity risk is the risk that the Bank is unable to meet its payment obligations associated with its financial liabilities when they fall due and to replace funds when they are withdrawn. The consequence of this may be the failure to meet obligations to repay depositors and fulfil commitments to lend.

The Bank's Management monitors the liquidity and manages the concentration and profile of debt maturities. Monitoring and reporting take the form of the daily cash position and projection for the next day, week and month as these are the key periods for liquidity management. Management monitors the movements of the main depositors and projection of their withdrawals.

The table in Note 31 is an analysis of the assets and liabilities of the Bank by relevant maturity based on the remaining period at the reporting date to their contractual or estimated maturity dates.

### 30.5 Capital management

The primary objectives of the Bank's capital management are to ensure that it complies with externally imposed capital requirements and it maintains strong financial position and healthy capital ratios to support its business and to maximize shareholder's value.

The Bank manages its capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of its activities. In order to maintain or adjust the capital structure, the Bank may adjust the amount of dividend payment to shareholder, return capital structure or issue capital securities. No changes were made in the objectives, policies and processes from previous years.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

# 31. MATURITY PROFILE OF ASSETS AND LIABILITIES

The following table presents an analysis of the maturity profile of the Bank's assets and liabilities as to whether they are expected to be recovered or settled within one year or beyond one year from the reporting date:

		31 December 2024			31 December 2023

### 32. LIQUIDITY RISK

### Financial assets

Analysis of financial assets into maturity grouping is based on the expected date on which these assets will be realized. For other assets, the analysis into maturity grouping is based on the remaining period from the end of the reporting period to the contractual maturity date or if earlier, the expected date the assets will be realized.

#### Financial liabilities

The maturity grouping of the financial liabilities is based on the remaining period from the end of the reporting period to the contractual maturity date. When a counterparty has a choice of when the amount is paid, the liability is allocated to the earliest period in which the Bank can be required to pay.

Maturity profile of the financial assets and liabilities based on the remaining period to repayment date is as follows:

	On demand and up to <u>1 month</u> US\$	> 1 to 3 months US\$	> 3 to 12 months US\$	> 1 to 5 years US\$	Over 5 years US\$	No fixed maturity date US\$	<u> </u>

### 33. FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES

Financial instruments comprise financial assets, financial liabilities and off-balance sheet instruments. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Bank has access at that date. The information presented herein represents the estimates of fair values as at the reporting date.

Quoted and observable market prices, where available, are used as the measure of fair values of the financial instruments. Where such quoted and observable market prices are not available, fair values are estimated based on a range of methodologies and assumptions regarding risk characteristics of various financial instruments, discount rates, estimates of future cash flows and other factors.

Fair value information for non-financial assets and liabilities is excluded as they do not fall within the scope of CIFRS 7, *Financial Instruments: Disclosures*, which requires the fair value information to be disclosed.

The fair values of the Bank's financial instruments such as cash on hand, balances with the NBC and other banks, loans to customers, deposits from customers and other financial institutions, certain other assets, certain other liabilities, borrowings and subordinated debts are not materially sensitive to shifts in market profit rate because of the limited term to maturity of these instruments. As such, the carrying values of these financial assets and liabilities as reporting date approximate their fair values.

The methods and assumptions used by the Bank in estimating the fair values of the financial instruments are:

#### Cash on hand and balances with the NBC and other banks

The carrying amounts approximate the fair values due to the short-term nature of these accounts.

#### Loans to customers

The fair value of loans and advances is based on observable market transactions. Where observable market transactions are not available, fair value is estimated using valuation models, such as discounted cash flow techniques. Inputs into the valuation techniques include expected lifetime credit losses, interest rates, prepayment rates, and primary origination or secondary market spreads. For collateral-dependent impaired loans, the fair value is measured based on the value of the underlying collateral.

Inputs into the models may include data from third party and information obtained from other market participants, which include observed primary and secondary transactions.

The fair value of loans to customers is estimated by discounting the estimated future cash flows using the prevailing market rates of financing with similar credit risks and maturities. Its carrying value approximates fair value as at the reporting date.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

# 33. FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES (continued)

### Deposits from customers

The fair value of deposits from customers with maturities of less than one year approximate their carrying amount due to the relatively short maturity of these instruments. The fair value of deposits from customers with remaining maturities of more than one year are expected to approximate their carrying amount due to the Bank offered similar interest rate of the instrument with similar maturities and terms and due to stability of interest rate in Cambodia.

The estimated fair value of deposits with no stated maturities, which includes non-interest bearing deposits, deposits payable on demand is the amount payable at the reporting date.

### Borrowings and subordinated debts

The borrowings are not quoted in an active market, and their value approximates the carrying amount.

The fair value of borrowings and subordinated debts are estimated by discounting the expected future cash flows using the applicable prevailing market interest rates for borrowings with similar risk profiles. However, only the contractual interest rates which are confirmed and provided by all lenders are available at the reporting date instead of the applicable prevailing market interest rates. The Bank believed that the contractual interest rates were not significantly different to the prevailing market interest rates on the ground that there was no change to interest rates following the lenders' consideration on the Company's credit risk profile as at reporting date. On this basis, the fair value of borrowings and subordinated debts approximate their carrying values at the reporting date.

#### Certain other assets and liabilities

Due to their short duration, the carrying amounts of certain other assets and liabilities in the statement of financial position are considered to be reasonable approximation of their fair values.

# Fair value hierarchy

CIFRS 7 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources and unobservable inputs reflect the Bank's market assumptions. The fair value hierarchy is as follows:

- Level 1 Quoted price (unadjusted) in active markets for the identical assets or liabilities. This level includes listed equity securities and debt instruments.
- Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3 Inputs for asset or liability that are not based on observable market data (unobservable inputs). This level includes equity instruments and debt instruments with significant unobservable components.

The Bank's financial assets and liabilities are not measured at fair value. As verifiable market prices are not available, market prices are not available for a significant proportion of the Bank's financial assets and liabilities, the fair values, therefore, have been based on management assumptions according to the profile of the asset and liability base. In the opinion of the Management, the carrying amounts of the financial assets and liabilities included in the statement of financial position are a reasonable estimation of their fair values.

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

# 33. FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES (continued)

# Fair value hierarchy (continued)

The table below summarizes the fair value hierarchy of financial asset and liability which are not measured at fair value in the statement of financial position but for which fair value is disclosed.

	2	024	2023			
	Carrying amount US\$	Fair value - Level 3 US\$	Carrying amount US\$	Fair value - Level 3 US\$

NOTES TO THE FINANCIAL STATEMENTS (continued) as at 31 December 2024 and for the year then ended

# 34. RESTATEMENT OF CORRESPONDING FIGURES

During the year, the Bank retrospectively adjusted certain figures to correct prior year's accounting error in relation to prepaid tax on income, which was recognized as income tax expense rather than income tax credit under other assets. Also, certain accounts in the financial statements for the year ended 31 December 2023 have been reclassified to conform to the current year's presentation. Accordingly, the impact on corresponding figures are as follows:

	As previously presented		Restate	tement Reclass		fication	As restated	
	US\$	KHR'000 (Note 2.4)	US\$	KHR'000 (Note 2.4)	US\$	KHR'000 (Note 2.4)	US\$	KHR'000 (Note 2.4)
